

Accessories

Aksesoris

To perfectly complete your installation, we recommend to use AlderonLite® accessories. For more detail, please visit our website at www.alderon.co.id.

Untuk menyempurnakan pemasangan atap anda, kami merekomendasikan untuk menggunakan aksesoris AlderonLite®. Untuk informasi lebih lanjut, silahkan mengunjungi website kami di www.alderon.co.id.

Installation

Cara Pemasangan

1. To avoid wrong installation, please always install AlderonLite® with “**THIS SIDE UP**” surface to the sun. For easy identification, this indication is printed near the edge side.
Caution : wrong side installation will void the warranty.
2. Use only rust proof fastener with domed weather shield. Pre-drill the holes at range of 3mm from the diameters of fastener to allow thermal expansion during noon time and constraction at night.
3. Overlay the top of anti-leakage coupling system on top of the underlap. For the length overlap, allow 200mm overlap for low pitch roof and 150mm for steeper one.
4. Minimum 10° roof pitch is required to ensure sufficient rain water run off.
5. The maximum overhang distance is 100mm for AlderonLite®.
6. Recommended purlin distance is max 1,200mm.

PREMIUM uPVC TWINWALL ROOFING

**INOVASI
BARU**

**PAS TEBALNYA
PAS KUATNYA**

Premium Vinyl Composite Twinwall Corrugated Roofing

AlderonLite® is latest innovation of Alderon which is the pioneer of hollow curve uPVC roof with the best quality. Designed as a solution to meet your roofing needs.

AlderonLite® is the first uPVC twinwall corrugated roofing with a thickness of 6mm that made and formulated with the best quality materials, so it is lighter in weight but still maintain its solidness and sturdiness.

AlderonLite® is reinforced by a UV resistant formula that makes the AlderonLite protected from ultraviolet rays and weather changes. So that makes you feel safe and comfortable when using the AlderonLite® roof.

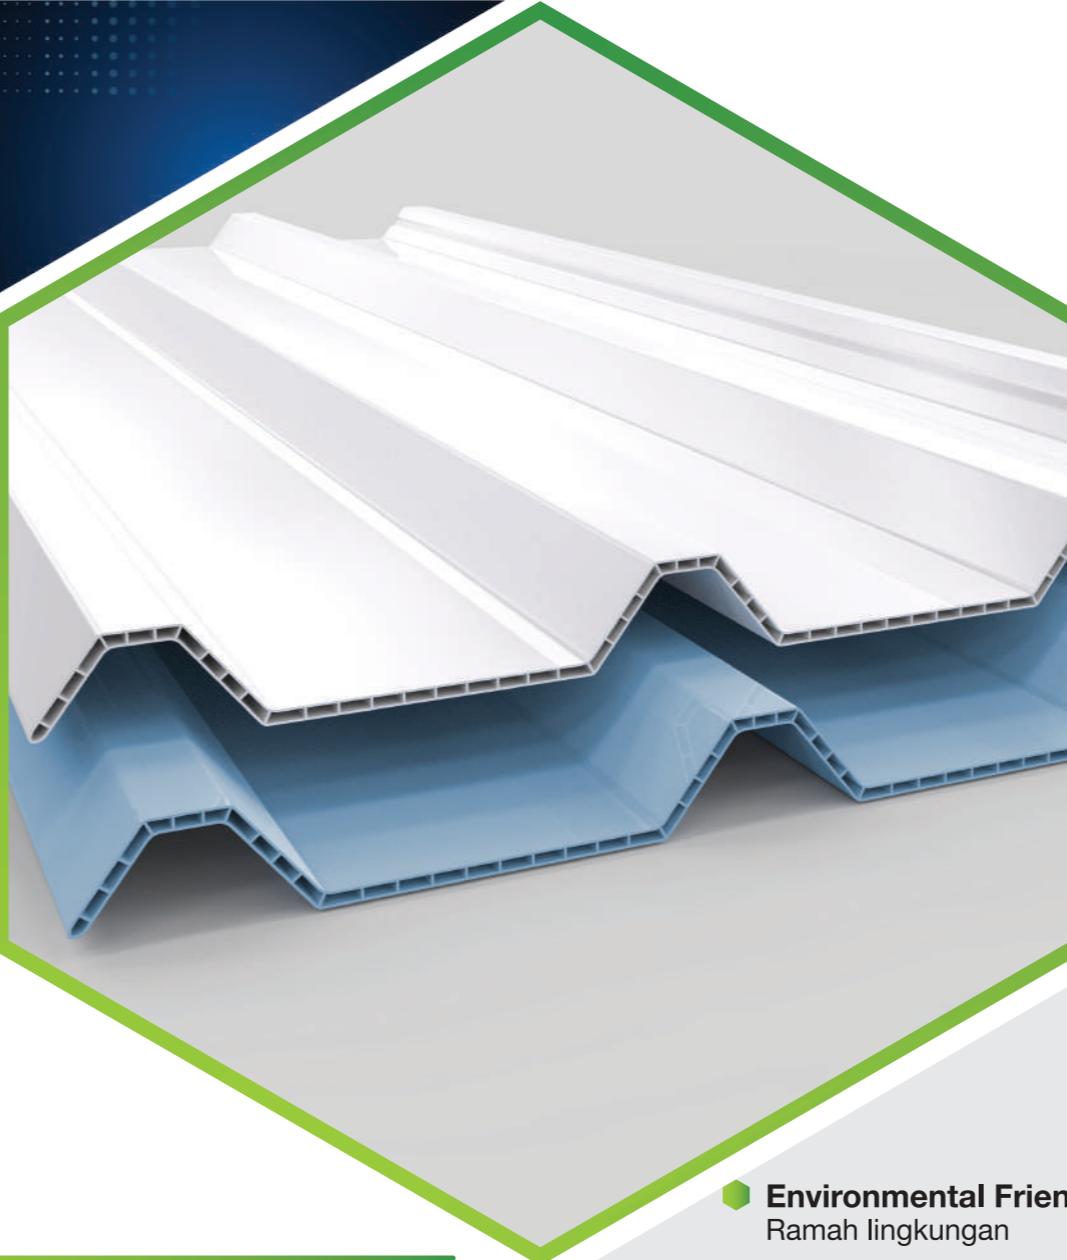

AlderonLite® is warranted for 10 years.

AlderonLite® adalah hasil inovasi terbaru dari Alderon® yang merupakan pioneer atap uPVC gelombang berongga dengan kualitas terbaik. Dirancang sebagai solusi untuk kebutuhan atap Anda.

AlderonLite® merupakan atap uPVC gelombang berongga pertama dengan ketebalan 6mm yang dibuat dan diformulasikan dengan bahan baku terbaik, sehingga bobotnya lebih ringan namun tetap kokoh dan kuat.

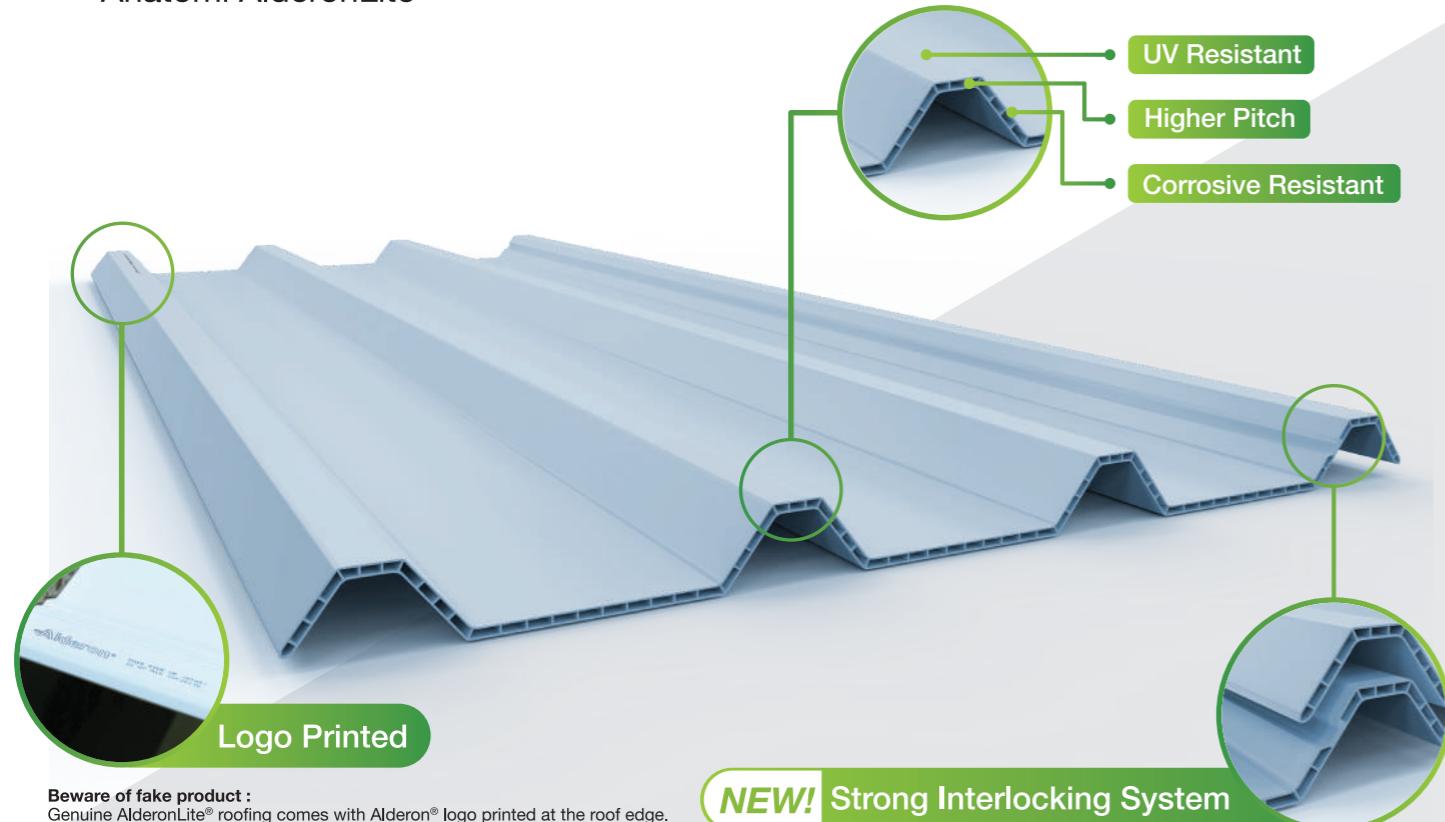

AlderonLite® diperkuat oleh formula pelindung UV yang membuat AlderonLite® terlindungi dari sinar Ultraviolet dan perubahan cuaca. Sehingga membuat anda merasa aman dan nyaman saat menggunakan atap AlderonLite®.

AlderonLite® bergaransi 10 Tahun.

Anatomy of AlderonLite®

Anatomi AlderonLite®

Beware of fake product :
Genuine AlderonLite® roofing comes with Alderon® logo printed at the roof edge.

Hati-hati terhadap produk palsu :
Atap AlderonLite® yang asli mempunyai logo Alderon® pada pinggiran atap.
